

iType | WIRELESS KEYBOARD FOR POPULAR PHONES AND OTHER BLUETOOTH DEVICES

Type anywhere with speed and accuracy.

Touch-screen typing can be frustrating and often leads to autocorrect features making incorrect guesses about what you meant to type. Eliminate this problem and get more out of your iPhone or other Bluetooth device with iType!

iType is a compact computer keyboard that transforms your iPhone or iPod touch into an ultra-portable computer. iType features a handheld bluetooth 49-Key QWERTY keyboard that connects to Smartphones with Bluetooth 2.0. The iType keyboard comes with a kickstand that your phone can rest on, and a leather case that holds both the kickstand and keyboard.

iType is compatible with a wide variety of portable phones and other devices including the Apple iPad, iPhone, iPod touch (iOS 2.0 or later), Windows Mobile (5.0 & later), Nokia

Symbian S60 (V3.0 & later) OS, Sony Playstation 3 and Bluetooth compatible computers with Windows/Mac/Linux OS.

Hit the road with iType!
